White Lion's Tail

White Lion's Tail

Leonotis leonurus 'Albiflora'

Height: 6 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: (annual)

Other Names: White Dagga, Cape Hemp, Lion's Ear

Description:

A very interesting member of the mint family presenting gorgeous clusters of white tubular blooms that develop a peach cast when mature; blooms in fall or early winter; excellent as a screen, or in containers

Ornamental Features

White Lion's Tail features showy clusters of white tubular flowers rising above the foliage from early to late fall. Its narrow leaves remain green in color throughout the year.

Landscape Attributes

White Lion's Tail is a multi-stemmed annual with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

White Lion's Tail is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

White Lion's Tail will grow to be about 5 feet tall at maturity, with a spread of 5 feet. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

White Lion's Tail is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
