Red Pinecone Shrimp Plant

Red Pinecone Shrimp Plant

Justicia brandegeana 'Red Pinecone'

Height: 4 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: (annual)

Other Names: *Justicia brandegeana*, syn. *Beloperone guttata*

Description:

This clump forming shrub produces showy bright orange-red bracts that resemble small pinecones; white flowers emerge from the bracts from spring to fall; evergreen in frost free areas; an excellent choice for containers and hanging baskets

Ornamental Features

Red Pinecone Shrimp Plant features showy white tubular flowers with shell pink overtones and brick red bracts at the ends of the branches from late winter to late fall. Its textured oval leaves emerge chartreuse in spring, turning light green in color the rest of the year.

Landscape Attributes

Red Pinecone Shrimp Plant is a dense multi-stemmed annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should only be pruned after flowering to avoid removing any of the current season's flowers. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Red Pinecone Shrimp Plant is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting
- Hanging Baskets

Red Pinecone Shrimp Plant

Planting & Growing

Red Pinecone Shrimp Plant will grow to be about 4 feet tall at maturity, with a spread of 4 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Red Pinecone Shrimp Plant is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
