

Bachman's™

Growing Since 1885

Love & Peace Rose

Rosa 'Love And Peace'

Height: 6 feet

Spread: 4 feet

Sunlight: ☉

Hardiness Zone: (annual)

Group/Class: Hybrid Tea Rose

Description:

A good looking plant to match the beauty of its blooms; full and bushy with lots of long stems and dense deep green foliage; abundant blossoms of soft yellow blushing to pink; naturally vigorous and continually blooming

Ornamental Features

Love & Peace Rose features showy lightly-scented yellow flowers with hot pink edges at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. Its glossy oval compound leaves remain dark green in color throughout the season. The fruits are showy red hips displayed in late fall.

Landscape Attributes

Love & Peace Rose is a multi-stemmed annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a high maintenance plant that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Love & Peace Rose is recommended for the following landscape applications;

- General Garden Use

Planting & Growing

Love & Peace Rose will grow to be about 6 feet tall at maturity, with a spread of 4 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
