

**Kolorscape® Cheri™ Rose**  
*Rosa 'KORelfkolo'*

Height: 4 feet

Spread: 24 inches

Sunlight: ☉

Hardiness Zone: 4b

Group/Class: Kolorscape Series

**Description:**

Beautifully radiant cherry red blooms that mature to pink, set on dense, disease resistant foliage that is dark green, providing excellent contrast; great for smaller garden areas and containers

**Ornamental Features**

Kolorscape Cheri Rose is blanketed in stunning clusters of cherry red flowers with hot pink overtones and gold eyes at the ends of the branches from mid spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves turn yellow in fall.

**Landscape Attributes**

Kolorscape Cheri Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Kolorscape Cheri Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Kolorscape Cheri Rose will grow to be about 4 feet tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achieve its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
