

Golden Sharpitor Fuchsia
Fuchsia 'Golden Sharpitor'

Height: 18 inches

Spread: 18 inches

Sunlight:

Hardiness Zone: 7b

Other Names: *Fuchsia magellanica* var. *molinae*

Description:

A compact bushy variety with beautiful green foliage with golden edges and variegation; nodding pale pink flowers dangle from above during the summer months; ideal for hanging baskets, patio containers and window boxes; adaptable as a houseplant

Ornamental Features

Golden Sharpitor Fuchsia features dainty nodding shell pink bell-shaped flowers with shell pink calyces at the ends of the branches from early summer to mid fall. It has attractive light green foliage edged in gold with hints of chartreuse. The pointy leaves are highly ornamental and remain light green throughout the winter.

Landscape Attributes

Golden Sharpitor Fuchsia is a multi-stemmed evergreen shrub with a shapely form and gracefully arching branches. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting butterflies and hummingbirds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Golden Sharpitor Fuchsia is recommended for the following landscape applications;

- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Golden Sharpitor Fuchsia will grow to be about 18 inches tall at maturity, with a spread of 18 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 8 years.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Golden Sharpitor Fuchsia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
