

**Lantanaphyllum Viburnum**  
*Viburnum x rhytidophylloides*

Height: 10 feet

Spread: 9 feet

Sunlight:

Hardiness Zone: 5a

**Description:**

A large, open broadleaf evergreen shrub with showy flat-topped clusters of white flowers in spring and fruit which starts pinkish-red changing to black in fall, highly ornamental; somewhat coarse, grows quite large, makes a great tall privacy screen

**Ornamental Features**

Lantanaphyllum Viburnum features showy creamy white flat-top flowers at the ends of the branches in mid spring. The dark red fruits are held in abundance in spectacular clusters from late summer to late winter. It has dark green deciduous foliage. The fuzzy narrow leaves do not develop any appreciable fall color.

**Landscape Attributes**

Lantanaphyllum Viburnum is a multi-stemmed deciduous shrub with a more or less rounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Lantanaphyllum Viburnum is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### Planting & Growing

Lantanaphyllum Viburnum will grow to be about 10 feet tall at maturity, with a spread of 9 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
