

**Summer Love Rose**  
*Rosa 'WEKhocamito'*

Height: 4 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 5b

Group/Class: Hybrid Tea Rose

**Description:**

An elegant rose with a mild, sweet fragrance and beautifully formed pale yellow blooms on a compact, bushy plant; excellent for cutting; kelly-green foliage creates interesting contrast to the luminous blooms

**Ornamental Features**

Summer Love Rose features showy lightly-scented buttery yellow flowers with yellow overtones at the ends of the branches from early summer to mid fall. The flowers are excellent for cutting. It has bluish-green deciduous foliage. The oval compound leaves do not develop any appreciable fall color.

**Landscape Attributes**

Summer Love Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Summer Love Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Summer Love Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
