

**Molonglo Juniper Leaf Grevillea**  
*Grevillea juniperina 'Molonglo'*

Height: 24 inches

Spread: 4 feet

Sunlight: ☉

Hardiness Zone: 8a

**Description:**

A hardy and adaptable species that will assume a low shrubby form; produces spidery apricot-peach flowers; grows well in most well drained soils; foliage may be sharp at the ends; an interesting indoor container plant

**Features & Attributes**

Molonglo Juniper Leaf Grevillea features delicate peach spider-like flowers along the branches from late winter to early summer. Its attractive spiny needle-like leaves emerge chartreuse, turning dark green in color throughout the year.

This is an open multi-stemmed evergreen houseplant with a spreading, ground-hugging habit of growth. Its relatively fine texture sets it apart from other indoor plants with less refined foliage. This plant may benefit from an occasional pruning to look its best.

**Planting & Growing**

When grown indoors, Molonglo Juniper Leaf Grevillea can be expected to grow to be about 24 inches tall at maturity, with a spread of 4 feet. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant requires direct sun for optimal performance, and should therefore be situated in a room that gets bright sunlight for a good part of the day; it is not a good choice for rooms lit only by artificial light. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

*-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --*
