

Easy Street Elm

Ulmus parvifolia 'Easy Street'

Height: 45 feet

Spread: 45 feet

Sunlight:

Hardiness Zone: 4

Other Names: Chinese Elm, Lacebark Elm

Description:

A magnificent shade or street tree featuring a strongly vase shaped habit and stunning mottled bark in brown, gray and orange, impressive in winter; highly resistant to Dutch elm disease, adaptable, considered one of the strongest branched selections

Ornamental Features

Easy Street Elm has dark green deciduous foliage on a tree with an upright spreading habit of growth. The small serrated pointy leaves turn an outstanding orange in the fall. The mottled brown bark is extremely showy and adds significant winter interest.

Landscape Attributes

Easy Street Elm is a deciduous tree with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Easy Street Elm is recommended for the following landscape applications;

- Shade

Planting & Growing

Easy Street Elm will grow to be about 45 feet tall at maturity, with a spread of 45 feet. It has a high canopy with a typical clearance of 6 feet from the ground, and should not be planted underneath power lines. As it matures, the lower branches of this tree can be strategically removed to create a high enough canopy to support unobstructed human traffic underneath. It grows at a fast rate, and under ideal conditions can be expected to live for 70 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
