

Mundi Rose
Rosa 'Mundi'

Height: 4 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 3

Group/Class: Old-Fashioned Shrub Rose

Description:

Possibly the most distinctive hardy shrub rose you can welcome into your garden, featuring truly unforgettable double white and pink-streaked flowers in early summer; bushy, upright habit, resistant to disease; needs full sun and well-drained soil

Ornamental Features

Mundi Rose is blanketed in stunning lightly-scented semi-double white flowers with yellow eyes and cherry red streaks at the ends of the branches in early summer. The flowers are excellent for cutting. It has green deciduous foliage. The oval compound leaves turn yellow in fall. The fruits are showy red hips displayed from mid to late fall. The spiny brick red bark adds an interesting dimension to the landscape.

Landscape Attributes

Mundi Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Mundi Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Mundi Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
