

Rubroplena Flowering Peach

Prunus persica 'Rubroplena'

Height: 20 feet

Spread: 20 feet

Sunlight:

Hardiness Zone: 5

Other Names: Common Peach

Description:

A highly ornamental tree for accent or specimen planting, featuring very showy, pink double flowers in spring, before the leaves, on an upright spreading form; a perfect choice for asian themed gardens

Ornamental Features

Rubroplena Flowering Peach features showy clusters of fragrant double rose flowers along the branches in early spring, which emerge from distinctive red flower buds before the leaves. It has dark green deciduous foliage. The narrow leaves turn yellow in fall.

Landscape Attributes

Rubroplena Flowering Peach is a deciduous tree with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Messy
- Insects
- Disease

Rubroplena Flowering Peach is recommended for the following landscape applications;

- Accent
- Shade
- Hedges/Screening

Planting & Growing

Rubroplena Flowering Peach will grow to be about 20 feet tall at maturity, with a spread of 20 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 40 years or more.

This tree should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
