

First Federal's Renaissance Rose
Rosa 'First Federal's Renaissance'

Height: 6 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 4

Group/Class: Hybrid Tea Rose

Description:

This variety produces nicely formed pink blooms with lightly scalloped petals; a prolific early summer bloomer that will continue until fall; it has good disease resistance and a bushy habit

Ornamental Features

First Federal's Renaissance Rose features showy double pink flowers with white streaks at the ends of the branches from early summer to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The oval compound leaves turn yellow in fall.

Landscape Attributes

First Federal's Renaissance Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

First Federal's Renaissance Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

First Federal's Renaissance Rose will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
