

Prairie Lass Rose

Rosa 'Prairie Lass'

Height: 5 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 4

Group/Class: Buck Rose

Description:

An extraordinary shrub rose that features abundant deep pink flowers with white edges and highlights; compact, upright habit, quite adaptable and resistant to disease, a valuable garden shrub; all roses need full sun and well-drained soil

Ornamental Features

Prairie Lass Rose is blanketed in stunning fragrant double hot pink flowers with gold eyes and white edges at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves turn yellow in fall.

Landscape Attributes

Prairie Lass Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Prairie Lass Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Prairie Lass Rose will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
