

**Georg Arends Rose**  
*Rosa 'Georg Arends'*

Height: 5 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 4

Group/Class: Old-Fashioned Shrub Rose

**Description:**

A vigorous variety producing lovely pink double blooms with gently recurved petals and a delicious fragrance; lovely in containers or as a bedding plant

**Ornamental Features**

Georg Arends Rose features showy fragrant double pink recurved flowers with gold eyes at the ends of the branches from early summer to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The serrated oval compound leaves turn yellow in fall. The fruits are showy red hips displayed from mid to late fall. The spiny brick red bark adds an interesting dimension to the landscape.

**Landscape Attributes**

Georg Arends Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering
- Disease
- Spiny

Georg Arends Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Georg Arends Rose will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
