

**Lime Martini Doublefile Viburnum**  
*Viburnum plicatum 'Limartz'*

Height: 10 feet

Spread: 8 feet

Sunlight:

Hardiness Zone: 4

**Description:**

A truly breathtaking shrub when in bloom; lime green emerging blooms mature to snowy white; attractive upward branching and good fall color; makes a fantastic specimen shrub

**Ornamental Features**

Lime Martini Doublefile Viburnum is draped in stunning balls of white flowers with lime green overtones held atop the branches from mid to late spring, which emerge from distinctive lime green flower buds. It has dark green deciduous foliage. The serrated pointy leaves turn an outstanding red in the fall.

**Landscape Attributes**

Lime Martini Doublefile Viburnum is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Lime Martini Doublefile Viburnum is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Lime Martini Doublefile Viburnum will grow to be about 10 feet tall at maturity, with a spread of 8 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
