

Saturnia Rose
Rosa 'Saturnia'

Height: 24 inches

Spread: 24 inches

Sunlight:

Hardiness Zone: 5

Group/Class: Hybrid Tea Rose

Description:

Glowing scarlet semi to double blooms that fade to pink; moderate fruity fragrance and rich deep green foliage; great for the garden, containers, or along borders; good disease resistance; blooms in flushes throughout the season

Ornamental Features

Saturnia Rose features showy lightly-scented double scarlet flowers with pink overtones, gold eyes and yellow centers at the ends of the branches from early summer to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Saturnia Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Saturnia Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Saturnia Rose will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
