

**Gold Variegated Japanese Euonymus  
(topiary form)**

*Euonymus japonicus 'Aureomarginatus (topiary)'*

Height: 10 feet

Spread: 6 feet

Sunlight: ○ ● ●

Hardiness Zone: 5

Other Names: Japanese Spindle Tree

**Description:**

Rich glossy dark-green foliage features wide yellow margins; seaside salt tolerance; a great hedge plant with light dense branches that tolerate shearing for a formal sculpted appearance

**Ornamental Features**

Gold Variegated Japanese Euonymus (topiary form) has attractive dark green foliage edged in yellow on a plant with an upright spreading habit of growth. The glossy oval leaves are highly ornamental and remain dark green throughout the winter.

**Landscape Attributes**

Gold Variegated Japanese Euonymus (topiary form) is a dense multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Gold Variegated Japanese Euonymus (topiary form) is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Topiary

### **Planting & Growing**

Gold Variegated Japanese Euonymus (topiary form) will grow to be about 10 feet tall at maturity, with a spread of 6 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub performs well in both full sun and full shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
