

Date Night™ Stunner™ Weigela
Weigela florida 'Spring 2'

Height: 3 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 4

Group/Class: Date Night Series

Description:

A magnificent, late spring blooming shrub, smothered in showy light pink trumpet shaped flowers; attracts hummingbirds; intriguing, dark plum-green foliage stands out in the landscape; excellent in groupings; needs full sun

Ornamental Features

Date Night Stunner Weigela is covered in stunning clusters of pink trumpet-shaped flowers along the branches from late spring to mid summer. It has attractive grayish green-variegated plum purple foliage with hints of coppery-bronze. The pointy leaves are highly ornamental but do not develop any appreciable fall color.

Landscape Attributes

Date Night Stunner Weigela is a multi-stemmed deciduous shrub with a mounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Date Night Stunner Weigela is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Date Night Stunner Weigela will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
