

**Jewel Box™ Evergreen Distylium**  
*Distylium 'BLDY01'*

Height: 3 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 6

Other Names: Evergreen Witch Hazel, Witchhazel

**Description:**

A refined evergreen plant with emerging light green foliage that matures to a glossy dark green; in late winter to early spring, small red flowers emerge along the older branches; very elegant when massed together or as an accent shrub

**Ornamental Features**

Jewel Box Evergreen Distylium is clothed in stunning panicles of red spider-like flowers along the branches from late winter to early spring. It has attractive dark green evergreen foliage which emerges light green in spring. The glossy oval leaves are highly ornamental and remain dark green throughout the winter.

**Landscape Attributes**

Jewel Box Evergreen Distylium is a dense multi-stemmed evergreen shrub with a stunning habit of growth which features almost oriental horizontally-tiered branches. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Jewel Box Evergreen Distylium is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Jewel Box Evergreen Distylium will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
