

Princettia® Pink Poinsettia
Euphorbia pulcherrima 'Princettia Pink'

Height: 12 inches

Spread: 18 inches

Sunlight:

Hardiness Zone: 10

Description:

An outstanding, compact selection featuring a base of dark green leaves, with small yellow floral tips at the terminal ends surrounded by large, hot pink bracts; keep away from cold drafts and keep soil evenly moist

Features & Attributes

Princettia Pink Poinsettia features bold clusters of yellow flowers with red overtones and hot pink bracts at the ends of the branches from late fall to mid winter. Its attractive pointy leaves remain dark green in color with distinctive creamy white veins throughout the year.

This is a multi-stemmed evergreen houseplant with a mounded form. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Princettia Pink Poinsettia can be expected to grow to be about 12 inches tall at maturity, with a spread of 18 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 1 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It does not require much in the way of fertilizing once established. It is not particular as to soil pH, but grows best in rich soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
