

Color The Sky Crimson Torchlily
Kniphofia 'Color The Sky Crimson'

Plant Height: 18 inches

Flower Height: 24 inches

Spread: 30 inches

Spacing: 24 inches

Sunlight:

Hardiness Zone: 5

Other Names: Red-hot Poker, Flame Flower, Tritoma

Group/Class: Color The Sky Collection

Description:

An excellent, compact variety with an upright habit, presenting stunning crimson red flower stalks, rising above deep green grass-like foliage; creates an unusual border or container addition; great cut flower quality; attracts pollinators

Ornamental Features

Color The Sky Crimson Torchlily features bold spikes of crimson tubular flowers at the ends of the stems from early to late summer. The flowers are excellent for cutting. Its grassy leaves remain dark green in color throughout the year.

Landscape Attributes

Color The Sky Crimson Torchlily is an open herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Color The Sky Crimson Torchlily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Color The Sky Crimson Torchlily will grow to be about 18 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 30 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. This plant does not require much in the way of fertilizing once established. It is not particular as to soil pH, but grows best in sandy soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Color The Sky Crimson Torchlily is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
