

ColorGrass® Lucius Wood Rush

Luzula nivea 'Lucius'

Height: 15 inches

Spread: 18 inches

Spacing: 3 feet

Sunlight:

Hardiness Zone: 4

Description:

A wonderful selection that flourishes in damp, shady areas; upright mounded habit of flat green, grass-like foliage fringed in white hairs; small, airy flowers appear in late spring and early summer; great for naturalizing woodland areas

Ornamental Features

ColorGrass Lucius Wood Rush is primarily valued in the garden for its cascading habit of growth. It features airy clusters of creamy white flowers rising above the foliage from late spring to mid summer. Its grassy leaves remain green in color throughout the year.

Landscape Attributes

ColorGrass Lucius Wood Rush is a dense herbaceous evergreen perennial with a shapely form and gracefully arching foliage. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

ColorGrass Lucius Wood Rush is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

ColorGrass Lucius Wood Rush will grow to be about 12 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 3 feet apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is an amazingly adaptable plant, tolerating both dry conditions and even some standing water. It may require supplemental watering during periods of drought or extended heat. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

ColorGrass Lucius Wood Rush is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
