

## Renauxii Creeping Philodendron Philodendron renauxii

Height: 3 feet Spread: 4 feet

Hardiness Zone: 10

Group/Class: Leafjoy Houseplants

## **Description:**

This stunning Philodendron spreads horizontally via rhizomes; in nature, it creeps on the ground and normally does not climb; features large, paddle shaped green leaves rising upward; a great tropical accent for indoor containers

## Features & Attributes

Renauxii Creeping Philodendron's attractive large glossy oval leaves remain forest green in color with pointy light green spines throughout the year on a plant with a spreading habit of growth. It features unusual spikes of white hooded flowers with creamy white overtones and dark red eyes along the stems from late spring to early fall.

## **Planting & Growing**

When grown indoors, Renauxii Creeping Philodendron can be expected to grow to be about 3 feet tall at maturity, with a spread of 4 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
