

Castilliano 2.0™ Rose Spanish Lavender

Lavandula stoechas 'Castilliano 2.0 Rose'

Plant Height: 10 inches

Flower Height: 14 inches

Spread: 8 inches

Sunlight:

Hardiness Zone: 7

Other Names: French Lavender, Butterfly Lavender

Group/Class: Castilliano 2.0 Series

Description:

This very free flowering variety is covered with deep fuchsia flower spikes with rose petals at the top; highly fragrant, attracting pollinators; ideal for borders, cottage gardens, and containers; hardy and disease resistant

Ornamental Features

Castilliano 2.0 Rose Spanish Lavender has masses of beautiful spikes of fragrant fuchsia flowers with rose overtones rising above the foliage from late spring to early fall, which are most effective when planted in groupings. The flowers are excellent for cutting. It has attractive grayish green foliage with hints of silver. The fragrant narrow leaves are highly ornamental and turn coppery-bronze in the fall, which persists throughout the winter.

Landscape Attributes

Castilliano 2.0 Rose Spanish Lavender is a dense multi-stemmed evergreen shrub with a mounded form. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub, and can be pruned at anytime. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Castilliano 2.0 Rose Spanish Lavender is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Castilliano 2.0 Rose Spanish Lavender will grow to be about 10 inches tall at maturity extending to 14 inches tall with the flowers, with a spread of 8 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. To help this plant achieve its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type, but has a definite preference for alkaline soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Castilliano 2.0 Rose Spanish Lavender makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
