

**Hers Manchurian Lilac**  
*Syringa pubescens 'Hers'*

Height: 8 feet

Spread: 8 feet

Sunlight:

Hardiness Zone: 3

Other Names: Weeping Lilac

**Description:**

This large shrub offers small, blue-green leaves on a dramatically arching plant reaching perhaps eight feet with a comparable spread; the dainty lavender flowers appear and fill the air with heavenly fragrance; ideal for the small garden

**Ornamental Features**

Hers Manchurian Lilac features showy panicles of fragrant lavender flowers rising above the foliage in late spring. The flowers are excellent for cutting. It has bluish-green deciduous foliage which emerges coppery-bronze in spring. The small heart-shaped leaves turn an outstanding deep purple in the fall.

**Landscape Attributes**

Hers Manchurian Lilac is a multi-stemmed deciduous shrub with a shapely form and gracefully arching branches. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Hers Manchurian Lilac is recommended for the following landscape applications;

- Accent
- General Garden Use

### **Planting & Growing**

Hers Manchurian Lilac will grow to be about 8 feet tall at maturity, with a spread of 8 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
