

Blue Evergreen Hydrangea

Dichroa febrifuga

Height: 7 feet

Spread: 5 feet

Sunlight: ● ●

Hardiness Zone: 8

Other Names: Chinese Quinine

Description:

An exotic evergreen shrub from the hydrangea family; branches hold large clusters of striking blue flowers that open from white buds; the blue shade is determined by the soil pH, more acidic produces deeper blue

Ornamental Features

Blue Evergreen Hydrangea is smothered in stunning clusters of blue star-shaped flowers at the ends of the branches from mid spring to early summer, which emerge from distinctive white flower buds. The flowers are excellent for cutting. It has attractive dark green evergreen foliage. The serrated oval leaves are highly ornamental and remain dark green throughout the winter. It features an abundance of magnificent steel blue berries in late summer.

Landscape Attributes

Blue Evergreen Hydrangea is a multi-stemmed evergreen shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and usually looks its best without pruning, although it will tolerate pruning. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Blue Evergreen Hydrangea is recommended for the following landscape applications;

- General Garden Use

Planting & Growing

Blue Evergreen Hydrangea will grow to be about 7 feet tall at maturity, with a spread of 5 feet. It has a low canopy with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This species is not originally from North America.
