

Summer Snowball Shasta Daisy
Leucanthemum x superbum 'Summer Snowball'

Plant Height: 24 inches

Flower Height: 3 feet

Spread: 24 inches

Spacing: 20 inches

Sunlight:

Hardiness Zone: 4b

Description:

An extraordinary shasta daisy producing fully double, white blooms with greenish-yellow centers, on rigid stems; a long lasting, beautiful addition to the garden when massed; blooms throughout the summer

Ornamental Features

Summer Snowball Shasta Daisy has masses of beautiful white daisy flowers with chartreuse eyes at the ends of the stems from late spring to late summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its serrated narrow leaves remain dark green in color throughout the season.

Landscape Attributes

Summer Snowball Shasta Daisy is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Summer Snowball Shasta Daisy is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Summer Snowball Shasta Daisy will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 20 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Summer Snowball Shasta Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
