

**Country Red Crapemyrtle**  
*Lagerstroemia 'Country Red'*

Height: 12 feet

Spread: 7 feet

Sunlight:

Hardiness Zone: 6b

Other Names: Crape Myrtle, Crepe Myrtle

**Description:**

This attractive ornamental shrub or small tree produces loads of bright red frilly blooms in summer, followed by yellow-orange fall foliage; a captivating focal point for the garden or border

**Ornamental Features**

Country Red Crapemyrtle is smothered in stunning panicles of red frilly flowers at the ends of the branches from mid summer to early fall. It has attractive dark green deciduous foliage which emerges coppery-bronze in spring. The oval leaves are highly ornamental and turn yellow and in fall.

**Landscape Attributes**

Country Red Crapemyrtle is a dense multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Country Red Crapemyrtle is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Country Red Crapemyrtle will grow to be about 12 feet tall at maturity, with a spread of 7 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
