

Snowcloud Flowering Crab
Malus 'Snowcloud'

Height: 20 feet

Spread: 15 feet

Sunlight: ☉

Hardiness Zone: 4a

Other Names: Roseybloom, Crabapple

Description:

This is a new variety with a profusion of showy snow white flowers in spring and yellow fruit in fall, upright habit of growth; makes an incredible accent for the smaller home landscape, needs full sun and well-drained soil; susceptible to scab

Ornamental Features

Snowcloud Flowering Crab is blanketed in stunning clusters of fragrant white flowers along the branches in mid spring, which emerge from distinctive pink flower buds before the leaves. The fruits are showy yellow pomes carried in abundance from early to late fall. It has dark green deciduous foliage. The pointy leaves turn yellow in fall.

Landscape Attributes

Snowcloud Flowering Crab is a deciduous tree with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Snowcloud Flowering Crab is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Snowcloud Flowering Crab will grow to be about 20 feet tall at maturity, with a spread of 15 feet. It has a low canopy with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
