

Depressa Aurea Juniper
Juniperus communis 'Depressa Aurea'

Height: 3 feet

Spread: 8 feet

Sunlight:

Hardiness Zone: 3a

Description:

An upright, sprawling evergreen shrub with very pointy needles, new growth is a delightful golden color, some discoloration in winter; relatively low growing, extremely adaptable to poor soils and dry locations, very hardy; good for color effect in mass

Ornamental Features

Depressa Aurea Juniper is a dwarf conifer which is primarily valued in the garden for its broadly spreading habit of growth. It has attractive chartreuse foliage with silver stripes which emerges yellow in spring. The needles are highly ornamental and turn coppery-bronze in the fall, which persists throughout the winter. It produces blue berries from late spring to late winter.

Landscape Attributes

Depressa Aurea Juniper is a multi-stemmed evergreen shrub with a ground-hugging habit of growth. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Depressa Aurea Juniper is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

Planting & Growing

Depressa Aurea Juniper will grow to be about 3 feet tall at maturity, with a spread of 8 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
